Journal American Association of Nurse Anesthetists Volume XXXV 1967 Index of Subjects and Authors

A

Aberg, Harriet L.: Hospital Safety, 221, 292

Abstracts, 55, 131, 222, 295, 386, 464

Acid-base balance, 429

Adriani, John: Complications of Anesthesia Due to Adjunctive Drugs, 265

American Association of Nurse Anesthetists: nominees, 300; officers, IFC; officers, IBC; program, 307

Analeptics, 45

Anesthesia, complications, 265; effects on circulation, 367; for battle casualties in Viet Nam (abstract), 465; for geriatrics (abstract), 143; for head and neck surgery, 113; for head, face or neck, 278; for heart surgery, 99; for myasthenic patient (abstract), 464; for nephroureterectomy (case report), 380; for tonsillectomy, 25; hyperpyrexia during (abstract), 295; hyperthermia during (abstract), 466, 467; intravenous regional, 455; laboratory (abstract), 386; pheochromocytoma in relation to, 362

Anesthetists (abstract), 63 (see nurse)

Arteriospasm, prevention (abstract), 464

Atropine, effect on heart (abstract), 298

Averbach, Albert: How to Handle an Anesthesia Injury Case, 206

Axillary block and dialysis (abstract), 224

B

Blood, loss (abstract), 133

Blood pressure (abstract), 63; measurement of (abstract), 226

Boggs, Roy E.: Regional Block and the Geriatric Patient, 372

Book Reviews: Advances in Anesthesiology: Muscle Relaxants, 294; Anesthesia for Neurosurgery, 229; Atlas of Surgical Operations, 293; Barbiturate Poisoning and Tetanus, 229; Circulation During Anesthesia and Operation, 470; Developing the Art of Understanding. A Guide for Nursing Students, 229; Drugs in Current Use, 1967, 68; High-Altitude Diseases: Mechanism and Management, 67; Hyperventilation and Hysteria: The Physiology and Psychology of Over-breathing and Its Relationship to the Mind-Body Problem, 293; Introduction to Anesthesia: The Principles of Safe Practice, 471; Laboratory Tests in Common Use, 68; Manual for the Recovery Room, 145; Manual of Preoperative and Postoperative Care, 389; Mechanical Artificial Ventilation. ERRATA

Viet Nam — New Challenge for the Army Nurse Anesthetist. By John A. Jenicek, Colonel, M.C., Ret. (J.A.A.N.A. October).

On page 348, the fourth paragraph, the second sentence reads: ". . . Depending on the rapidity of evacuation and early resuscitation measures available, the nurse anesthetist at the receiving installation is suddenly the director of initial or continued resuscitation procedures of any or all types just mentioned."

The sentence should read: ". . . Depending on the rapidity of evacuation and early resuscitation measures available, the nurse anesthetist at the receiving installation is a member of a professional medical team which must initiate or continue any or all of the resuscitation procedures mentioned."

On page 349, the first sentence of the second paragraph reads: "Turning from the spectacular to somewhat equally dramatic problems, the nurse anesthetist is a teacher at all levels of first-aid and resuscitation. . . ."

The sentence should read: "Turning from the spectacular to somewhat equally dramatic problems, the nurse anesthetist is often asked by the medical officer to teach first-aid and resuscitation. . . ."
